

Tammy Speed

Full-Stack Javascript
Developer

Core Skills

- Javascript/Node.js
- Express
- React & Redux
- Handlebars
- PostgreSQL
- HTML/CSS

Other

- Accessibility
- Testing with Jest
- Git/GitHub
- Heroku
- CI/CD

PROFILE

I am a junior Software Developer with a passionate for building accessible applications with intuitive, user-friendly web experiences and producing readable and maintainable code.

EXPERIENCE

WORKERBIRD

<https://www.workerbird.co.uk/>

Workerbird is a tech-for-good startup aiming to "help low-wage workers collect what they deserve". I was one-half of the development team responsible for building the new Workerbird website.

FOUNDERS & CODERS

FEBRUARY 2018 - JUNE 2018

Founders and Coders is a 16-week, full-stack Javascript course focusing heavily on pair programming, project-building and peer-led learning. I gained experience in each week's topic through pairing workshops and collaboratively building a new project each week in small teams. In the second half, I built larger web applications in 3-week sprints while implementing design/UX best practices. My final project was designed and built for Grandparents Plus, a UK-based, charity organization.

PROJECTS

GRANDPARENTS PLUS

<https://github.com/tspeed90/my-wayfinder>

An accessible, decision tree web application built to assist grandparents and other guardians visiting the Grandparents Plus website, help them recognize their 'Kinship Carer' status, guide them to relevant resources, and provide information for an advice callback from the charity.

USES: React, Node.js, Express, Jest, Styled Components

Mentoring

- Codebar
- Founders & Coders
- Kensington & Chelsea Foundation

BOOKQUEUE

<https://github.com/tspeed90/book-queue>

An application to inspire reading. BookQueue helps users find popular best-selling books and keep track of which books to read next. Users will soon also be able to move books to a "finished" shelf to help keep them on track to meet their reading goals.

USES: React, Redux, Node.js, Express, Webpack, PostgreSQL DB with Sequelize, Jest, Styled Components

EDUCATION

CSU FRESNO | Graduated 2013

Bachelor of Arts in Deaf Studies, emphasis in American Sign Language interpreting

PREVIOUS EXPERIENCE

SAN JOSE CITY COLLEGE | Jan 2014 - Dec 2016
Sign Language Interpreter

I provided American Sign Language interpreting services for Deaf/Hard-of-Hearing students and staff. I interpreted a variety of university courses including Early Childhood Education, Aviation, Art and Cosmetology as well as campus events. I also helped guide and support new hires.
